

Professional Summary

plications and AI-powered products from the ground up.
Experienced in designing full-stack systems using Next.js, React, Node.js, Express.js, and MongoDB, with a growing focus
Passionate about understanding how products work
erformance, designing maintainable architectures, and solving
llenges through hands-on development.

SKILLS

Languages:	SQL ,Java
Frontend :	
Backend :	<u>ST APIs</u> _____
Database:	MongoDB
System Design :	Caching, Scalability , Load Balancing
DevOps:	, Microservices , CI/CD

PROJECTS

- Generative AI:** Designed and implemented an innovative GitHub bot, harnessing the capabilities of advanced
automate the generation of Continuous Integration (CI) workflows within GitHub,
enhancing efficiency and productivity. [github.com/apps/devops-llm-bot]
- Azure Cloud Solution**ecure password management solution leveraging Azure's cutting-edge
security and networking capabilities, incorporating Azure AD, Azure KeyVault, Azure VNet, and Azure APIM, to ensure
ction and access control.
- DevOps:** Created an IP solution bridging Azure DevOps' library group features with GitHub Actions, widely adopted
across large Microsoft projects, and available on GitHub Marketplace as an open-source tool.
- Mobile App**inder app that
h to trigger reminders based on vicinit of a person, amassing over 500 downloads on Google Play Store.
