

Parth Sharma | Full Stack Software Developer

91+ 8287004114 | parthxdev404@gmail.com | github.com/parthxdev404 | linkedin.com/in/parthh-sharma

Professional Summary

Software Developer focused on building scalable web applications and AI-powered products from the ground up. Experienced in designing full-stack systems using Next.js, React, Node.js, Express.js, and MongoDB, with a growing focus on System Design, Cloud Infrastructure, DevOps, and Generative AI. Passionate about understanding how products work beyond the frontend by optimizing APIs, improving performance, designing maintainable architectures, and solving real-world engineering challenges through hands-on development.

SKILLS

Languages:	Javascript, Typescript , SQL ,Java
Frontend :	React , Nextjs , TailwindCSS , GSAP , Redux
Backend :	Node.js , Express.js , REST APIs
Database:	MongoDB
System Design :	API Design, Database Design, Caching, Scalability , Load Balancing
DevOps:	AWS , Docker , Linux , Kubernetes , Microservices , CI/CD

PROJECTS

Generative AI: Designed and implemented an innovative GitHub bot, harnessing the capabilities of advanced Language Models (LLMs), to automate the generation of Continuous Integration (CI) workflows within GitHub, enhancing efficiency and productivity. [github.com/apps/devops-llm-bot]

Azure Cloud Solution: Engineered an ultra-secure password management solution leveraging Azure's cutting-edge security and networking capabilities, incorporating Azure AD, Azure KeyVault, Azure VNet, and Azure APIM, to ensure top-notch data protection and access control.

DevOps: Created an IP solution bridging Azure DevOps' library group features with GitHub Actions, widely adopted across large Microsoft projects, and available on GitHub Marketplace as an open-source tool.

Mobile App: Won first prize in an app development marathon for Oncue, a groundbreaking Android reminder app that utilizes Bluetooth to trigger reminders based on vicinity of a person, amassing over 500 downloads on Google Play Store.
